

agentchat.contrib.llava_agent

LLaVA Agent Objects

```
class LLaVAAgent(MultimodalConversableAgent)

__init__

def __init__(name: str,
              system_message: Optional[Tuple[str, List]] = DEFAULT_LLAVA_SYS_MSG,
              *args,
              **kwargs)
```

Arguments:

- name *str* - agent name.
- system_message *str* - system message for the ChatCompletion inference. Please override this attribute if you want to reprogram the agent.
- **kwargs *dict* - Please refer to other kwargs in [ConversableAgent](#).

llava_call

```
def llava_call(prompt: str, llm_config: dict) -> str
```

Makes a call to the LLaVA service to generate text based on a given prompt
